

MELBOURNE  
Sea Slug Census  
Splendid Slugs of our Southern Sea

2019

# Melbourne Sea Slug Census V

**Friday 4 - Monday 7 October 2019**

Using your underwater camera, collect images of Sea Slugs anywhere in Port Phillip Bay, Westernport Bay and surrounds!

If you're out and about in the area we want to know what you find. It's up to you how you find them, but always remember to follow safe diving, snorkelling and rock pooling practices.

## Census Suggestions

1. Photos for the census are to be taken within Port Phillip Bay, Westernport Bay and surrounds, between **00:01am Friday 4 October 2019 – 23:59 Monday 7 October 2019**.
2. Send in **one photo for each species** of sea slug you encounter on census weekend. You don't need to identify the slugs (although please do if you can), just take their photos!
3. Photos should be cropped around the slug, shrunk to around 640x480 pixels, and submitted by email or dropbox to [melbourneseaslugcensus@gmail.com](mailto:melbourneseaslugcensus@gmail.com) by **Sunday 13 October**.
4. Emails should include the names of everyone involved in capturing the image and details of the location where photos were taken. If you collect images at more than one site please indicate which photos were taken at which site. For a photo to be considered, it must be named as:

**Photographer Name\_Location\_Sea Slug name (if known)\_Date**

There will be prizes up for grabs!

Head to [vnpa.org.au/sea-slugs](http://vnpa.org.au/sea-slugs) for more details.
